

VIDOS Video Management System

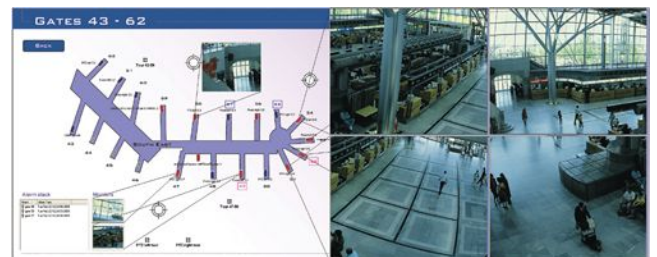

- ▶ All-in-one video management centre solution
- ▶ Site-map based user interface
- ▶ CCTV virtual matrix management
- ▶ Analog monitor support
- ▶ Database-driven system management
- ▶ Extensive alarm handling
- ▶ Sophisticated playback features including trick replay functions
- ▶ Automated guard tours
- ▶ VIDOS-NVR compatible
- ▶ Automation interface for VIDOS management from control systems

VIDOS Installation Package

This installation provides a powerful and fully customizable video management system. It installs VIDOS, the VIDOS Archive Player & Exporter, the Configuration Manager and the necessary software environment as a 30-day trial version. The installation can then be licensed according to the application's requirements and configured to run as a stand-alone workstation or to work as a client for VIDOS Server. Exporter in VIDOS Archive Player, VIDOS Automation Interface and VIDOS Intuikey Integration require separate licenses.

Together with the other powerful components in the VIDOS Pro Software Suite including VIDOS Lite Viewer and VIDOS Monitor Wall applications, this installation package with VIDOS, VIDOS Archive Player & Exporter and the Configuration Manager is ideally suited to CCTV applications of any scale. Built-in scripting and application programmer's interfaces (APIs), like the Automation Interface to remotely control VIDOS, allow for easy integration with, or the enhancement of existing security solutions.

VIDOS

VIDOS is a unique and powerful video surveillance and alarm management software product that enables security and surveillance professionals to perform sophisticated tasks with ease. Based on the intuitive graphical concept of site-maps, VIDOS puts the operator firmly in control of the world around him.

VIDOS is fully customizable, allowing you to run your CCTV system the way you want to and keeping training down to a minimum. Additionally, CCTV keyboard integration enables the operator to control all devices, alarms and even sitemaps in the same way as controlling a conventional system.

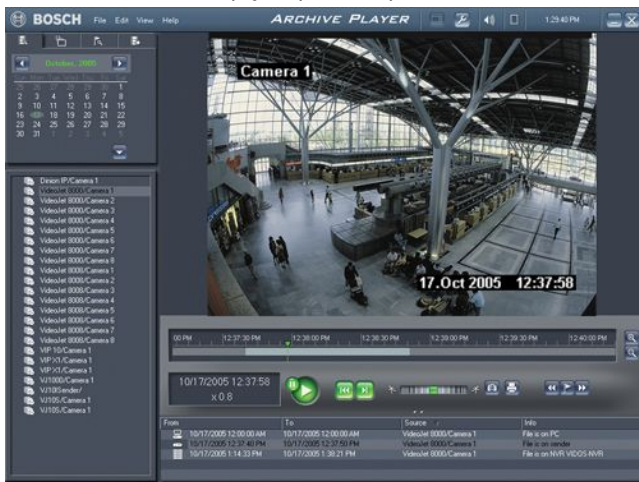

VIDOS integrates with all existing peripheral equipment like dome cameras and analog monitors. With its sophisticated touring and patrolling functions, automatic recording tasks and comprehensive archive

features VIDOS offers functionality and performance unprecedented in CCTV applications. As part of the VIDOS Pro Software Suite, VIDOS may act as a client in combination with VIDOS Server enabling centralized management and control. This enables an administrator to set different authorization levels for groups of users, which in turn controls VIDOS client privileges for live viewing, PTZ, recording and retrieval. In smaller applications, where only a few users, authorisation levels, privileges and priorities are required, it may act as a full-blown video management system solution in itself, controlling an unlimited number of cameras.

VIDOS is available as software only, supporting 16, 32, 64 or an unlimited number of cameras and monitors. There is also a choice of two pre-configured hardware solutions for easiest and fastest integration.

VIDOS Archive Player & Exporter

VIDOS Archive Player & Exporter, part of the VIDOS Pro Video Management Software Suite, allows operators to very easily search and playback pre-recorded video and events and export them for subsequent use. The software allows operators to replay from any VideoJet, NVR or local hard disc, search for video sequences and bookmarks and simply export sequences

VIDOS Archive Player & Exporter presents a quick and easy to use interface that is designed to accelerate the process of browsing available recordings and uses intuitive time and calendar features to home in on specific events and bookmarks. By instantaneously switching between replay and export screens the search time is further minimized. All search results are tracked in concise lists that can easily be processed for export to other storage media. With the integrated Direct-Burn function, the export files can be directly written to CD (assuming a CD-RW drive is attached).

As part of the VIDOS Pro Software Suite, VIDOS Archive Player & Exporter can be used in combination with VIDOS Server which offers centralized management and control. This enables an administrator to set user privileges, and their right to access cameras and recordings via VIDOS Archive Player & Exporter.

VIDOS Automation Interface

The VIDOS Automation Interface provides remote control and supervision via a socket interface. It resembles a „programmer’s style“ ASCII string command interface for video and audio switching, to control digital I/O and alarms, to control workspace and for event subscription and delivery. The VIDOS Automation Interface provides two basic mechanisms: one for issuing synchronous commands and one for receiving event information. To ensure authenticity the external controller needs to login with username and password.

Access to the automation interface must be explicitly enabled and is password protectable.

1 External controller

VIDOS IntuiKey Integration

Use the ergonomic advances of the Bosch IntuiKey CCTV keyboard for full control of networked surveillance. Almost all VIDOS functions are accessible without the need for mouse or PC keyboard access of the operator, bringing the traditional matrix input device to a new level of experience.

Ease the migration from the analogue to the digital world by switching cameras and monitors via the keypad. Control the pan, tilt and zoom positions via the

joystick and use the camera menu for accessing all auxiliary AutoDome functions. Direct keys are available for recalling camera presets and acknowledging alarms. Four direct menu keys provide quick access to functions for user authentication, recording and snapshots, sitemap navigation, camera menus and replay control.

The Bosch IntuiKey unique custom programmable softkey feature enables up to six fully programmable softkeys per sitemap for guided map navigation and device control.

Technical Specifications

Minimum System Requirements

Hardware	Personal Computer
CPU	Pentium IV, 3.0 GHz or better
Hard Disk Interface	IDE or better
RAM	256 MB
OS	Windows XP Home/XP Professional
Graphic Card	NVIDIA GeForce 6600 NVIDIA Quadro FX 1400 ATI RADEON X600/X800 or better
Ethernet Card	100 Mb
Sound Card	Recommended
Software	DirectX 9.0c
Free Memory (Installation)	120 MB (.NET environment, VIDEOS, VIDEOS Archive Player, Configuration Manager)

Software Features

VIDOS

Tree View	User configurable, Explorer style resource tree
Display	Drag and drop connection control User definable video windows Built-in electronic zoom function Simultaneous viewing of several video streams Full screen mode viewing On-screen or in picture PTZ camera control Multiple, user definable workspaces Window snap organizer Addition of multiple external monitors JPEG snapshot overview of all connected devices
Scan Network	Autoscan function over the complete network JPEG snapshot overview of all devices Remote upload of devices via LAN/WAN Scan result copy to a clipboard by one mouse click
Site Map	Built-in site map editor Background bitmap graphics User definable symbols with programmable functions, e.g. Hyperlinks Fully scalable and movable software monitors External hardware monitor support Automatic camera activation on alarm
Configuration	User groups and privileges Device properties Device COMs for remote camera control Preset camera sequences (Salvos)
Trigger and Alarm	Logical trigger creation Scheduler Alarm stack log

	Programmable alarm triggered jobs
	Integrated alarm testing
	Action plans for alarm handling
Recording	Recording configuration in encoders Simultaneous recording of video, audio and transparent data Scheduled and alarm recording Ring recording function per camera Synchronous playback of multiple cameras
	JPEG snapshot
NVR (option)	Full Network Video Recording functionality and advanced recording features by implementation of VIDOS-NVR modules (see respective data sheet)
VIDOS Archive Player	
Tree View	User configurable resource tree
Replay	From VIP/VideoJet devices, NVR and local hard disc Calendar and time range search function Bookmark setting and search function Built-in digital zoom function Dynamic timeline Trick mode replay Full screen mode JPEG snapshot with direct print function
Export (option)	Simultaneous export of video and audio of multiple recordings Direct burn on CD
Configuration	Through Configuration Manager
